Mohammad Mukhtar Mohsin

Full Stack Web Developer

PROFESSIONAL SUMMARY

Diligent Full Stack Web Developer with expertise in MERN stack, backed by a robust foundation in Data Structures and Algorithms (DSA). Accomplished in crafting both independent and collaborative projects. Possesses a blend of technical know-how and teamwork, ready for meaningful contributions.

PROJECTS

1. TalentTech | 🌐 | 🐙
React | Express | Tailwind

- Developed a virtual interviewer web application using React, Express, and TailwindCSS.
- Implemented the OpenAI API for natural language processing to create interactive job interview simulations.
- Designed a user-friendly interface to provide a seamless experience for both candidates and interviewers.
- Utilized modern web development practices to ensure scalability, performance, and maintainability of the application.

2. MusicMix | 🌐 | 🐙
React | Express

- Developed a fully functioning music streaming application using React and Express
- Implemented a user-friendly interface similar to Spotify
- Collaborated with product managers to understand project requirements and translate them into functional web application
- Utilized React for frontend components and Express for efficient server-side APIs
- Ensured seamless integration between frontend and backend components of the application

WORK EXPERIENCE

Amazon
Customer Support Associate
September 2021 - February 2022
Job responsibilities:

- Demonstrated empathy and active listening skills to understand customer concerns.
- Leveraged strong problem-solving abilities to analyze complex issues.
- Utilized excellent communication skills, both written and verbal, to convey information clearly.
